

KODAK introduces the Endurance microSD memory card: Unwavering reliability for continuous surveillance

We are thrilled to announce the launch of our latest high-durability storage solution: the KODAK microSD Endurance. Designed specifically for CCTV systems, dashcams, and home security cameras, it offers exceptional durability and longevity to protect your most critical recordings.

Exceptional Durability and Peace of Mind

The KODAK microSD Endurance card is optimized for continuous 24/7 recording. Thanks to its write cycle management technology, it supports thousands of hours of intensive video recording.

64GB: Up to 20,000 hours of continuous recording.

128GB: Up to 40,000 hours of continuous recording.

This ensures that every important second is captured flawlessly, even during frequent rewrites.

Certified 4K performance.

Equipped with UHS-I U3, V30, and A2 standards, this card ensures smooth video streaming, even in 4K Ultra HD. With read speeds of up to 100 MB/s, transferring your files to other devices is fast and efficient.

Why choose the KODAK microSD Endurance?

- **High endurance:** Up to 40,000 hours of video capture (on the 128GB model).
- **Optimized for monitoring:** Ideal for loop recording.
- **Transfer speed:** Up to 100 MB/s read for fast data access.
- **Robust design:** Durable and reliable for use in a variety of environments.
- **Included:** microSD to SD adapter supplied in each pack.

*Duration estimates are based on Full HD (1920x1080) video at 26 Mbps. Actual duration may vary depending on the host device and settings.

Availability: Available now in 64GB and 128GB. For more information, visit www.kodakflash.com.

About KODAK

For decades, KODAK has been synonymous with innovation in imaging and photography. Continuing this legacy, the brand now offers high-performance digital storage solutions designed to meet the needs of modern creators combining speed, reliability, and trusted quality at every stage of the creative process.

Up to 40 000h of continuous recording*
*Approximation based on Full HD (1920x1080) video recorded at 25 Mbps for the 128GB model. Lower recording time for 4K UHD. Actual continuous recording time may vary depending on host device, settings, battery capacity and environmental factors.

Jusqu'à 40 000h d'enregistrement continu*
*Approximation basée sur une vidéo Full HD (1920x1080) enregistrée à 25 Mbps sur le modèle 128Go. Durée d'enregistrement plus faible en 4K UHD. La durée d'enregistrement réel peut varier selon l'appareil hôte, les réglages, la capacité de la batterie et les facteurs environnementaux.
